Owner Information:

First Name _____ Middle _____ Last _____

Address: _____

City: _____ State _____ Zip _____

Phone: _____ Cell: _____ Can we text you? -Yes

Email: _____

How to Collect a Hair Sample

Pulling hair is very easy.

Pull 40-50 hairs from the horse's mane, by the roots, from the withers.

DO NOT touch the roots. Twist 20, or so, hairs around a finger, about an inch away from the skin and pull straight out. Repeat the process, if needed. **DO NOT CUT THE HAIRS FROM YOUR HORSE!**

Handle the hairs by the shaft. Long shafts of hair are not necessary, as DNA is extracted from the roots. For very young foals, hair from the tail is preferred, as it has larger root bulbs.

DO NOT PUT HAIR IN A PLASTIC BAG OR SEPARATE ENVELOPE

To order DNA markers, please enclose **\$85.00** for Mystery horse or **\$65.00**-markers only.

Make payable to:
Heritage Horse International

SEND A COPY OF ANY PAPERS
If you have them.

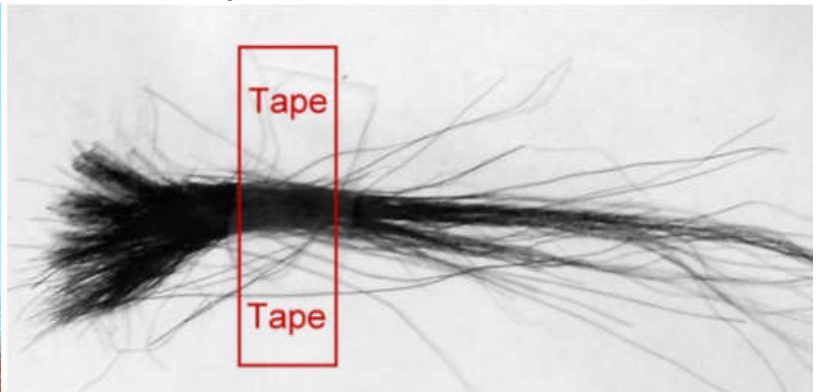

Tape hair on the back, in the middle of this paper and fold the paper in thirds around the hair.

FOLD BACKWARDS HERE-----

Pull from the withers, like this:

Hair sample should look something like this:

Mail hair to: Friesian Heritage Horse ~ 1266 150th Avenue ~ Ogilvie, MN 56358
